TRUE PIANO TONES AT LAST ACHIEVED IN PHONOGRAPHIC REPRODUCTION

Reader Note: This announcement of the most notable accomplishment of years in phonographic reproduction, is made with the approval of world authorities, before whom the remarkable pianoforte records mentioned below, were demonstrated. For years highest musical authorities said it was impossible.

That no phonographic record, no phonograph, could convey piano notes without "mechanical" suggestion—without shallowness or vibration.

Now Brunswick announces perfect rendition! Tones deep and clear—notes amazing in their fidelity.

And world authorities proclaim this the Supreme Achievement in recording and reproducing music.

What Critics Say

"The 'impossible' achieved, and proof indisputable offered in two remarkable pianoforte records."

"To hear these masterly renditions by Godowsky (Brunswick releases) is to learn, to your own amazement, that the elusive notes of the piano have finally yielded to phonographic reproduction," says another.

"A notable advance over anything heretofore accomplished in recording," writes the head of a great conservatory; "tones are almost unbelievably true, sweeter and more beautiful."

Exclusive Methods the Reason
By virtue of exclusive methods of Re-

production and of Interpretation, Brunswick achieves perfect rendition of the so-called difficult tones—the piano, the harp, the human voice; attaining even soprano High C without metallic intrusion, chatter or vibration. Methods which apply to no other phonograph or records.

The Brunswick Method of Reproduction is exclusively Brunswick. The Brunswick Method of Interpretation, in producing records, has not been successfully imitated.

Hence, confining your record purchases to any one make of records; or buying any phonograph, without at least hearing The Brunswick; is a mistake. Come in for a demonstration. The Brunswick plays all records—and Brunswick Records can be played on any phonograph. Hear, compare—then judge for yourself.
